**DETAILED ACTION**

1. This office action is in response to communication filed on 7/13/2006.
2. Claims 1-31 are presented for examination.

**Claim Rejections - 35 USC § 103**

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Owensby.

With respect to claims 1, 4-6, 10-15, 18-20, 24-31 Owensby teaches a method for context-sensitive advertising (Abstract). Receiving a signal from a mobile wireless device (col. 12, lines 4-24); identifying an identifier associated with the mobile wireless device; ascertaining a state of the mobile wireless device (i.e. identifying the mobile ID and verifying the direct call signal communication with the mobile device)(col. 12, lines 4-37 and col. 15, lines 32-67); determining a location of the mobile device (col. 12, lines 38-60); updating the identifier, state, and location in a profile database utilizing a context engine (col. 12, lines 38-60); associating the location of the mobile wireless device and a landmark in the profile database; selecting advertisements from the advertisements database based on the identifier, state, location, and landmark of the mobile device

Art Unit: 3622

utilizing the context engine; and transmitting the advertisements to the mobile wireless device (col. 14, lines 63 to col. 15, lines 1-31 and col. 16, lines 3-21).

With respect to the newly added limitation of continuously automatically updating a user profile based on access to advertisements and device access of network sites indicative of user preferences. Owensby teaches on col. 5, lines 46-67, continuously updating the user's profile based on the information received by the user on the advertisements and on col. 2, lines 47-54 providing future access to global computer networks.

Owensby is silent as far as updating the user's profile based on access to the advertisements and to device access of network sites indicative of user preferences. Official notice is taken that it is old and well known in the advertisements related arts to provide access to sites based on user's preferences and to monitor how and by what means the information is being accessed by the user. For example, based on sites previously visited by a user and how the user was linked or went to the particular site is monitored in order to customize additional information, access to the information presented or sites that might be of interest to the user. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included access to the ads and device access of network sites indicative of user preferences in order to obtain the above mentioned advantage.

With respect to claims 2-3, 16-17 Owensby further teaches that the wireless device is a cellular phone utilizing cellular technology (see Figure 1).

With respect to claims 9 and 23, Owensby further teaches that the state includes at least one of ON state (i.e. the state of the mobile device is verified by the direct call signal communication with the device, therefore the state of the mobile device has to be On in order to signal direct communication with the device (col. 12, lines 4-37).

Claims 7-7 and 21-22, further recite that the cell identifier has an alias consisting of HOME, WORK and PLEASURE. Owensby teaches that the cell has an identifier (col. 15, lines 32-52). Owensby doesn't specifically teach having an additional identifier consisting of HOME, WORK and PLEASURE. Official notice is taken that it is old and well known to use alias in order to easily identify a person, a place, etc. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included the cell identifier consisting of HOME, WORK and PLEASURE in order to achieve the above mentioned advantage.

#### **Response to Arguments**

5. The 101 rejection has been withdrawn.

#### **Conclusion**

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
